

A Conversation with the Insurance Industry About Lithium-Ion Batteries

Thursday, October 12th 2023

FDNY FIRE TRAINING ACADEMY
RANDALL'S ISLAND, NEW YORK, NY
9AM-5PM

This workshop will explore how the insurance industry, the fire service, and government can collaborate for the safety of the public. The electrified future requires innovative solutions to the emerging challenges as new products and business develop. The workshop will seek to build relationships with the groups in attendance for the benefit of all involved.

Audience: Insurance, Government and Public Safety Representatives

TOPICS

- ◆ Lithium-Ion battery incidents in New York City
- ◆ Lithium-Ion battery fundamentals & failure modes
- ◆ NYC & FDNY Risk Reduction Strategies
- ◆ Understanding the costs of proper remediation and restoration for li-ion battery fires
- ◆ Highlight programs that improve safety, minimize risk and potentially limit insured losses.
- ◆ Discuss how local permitting requirements and the insurance industry can collaborate to create safer occupancies where Li-Ion batteries are utilized, and reduces insured losses.
- ◆ Electric vehicle fires and potential cost recovery requests by fire departments

Cost - \$100 (includes Breakfast and Lunch)
